

**IN OFFICE LABORATORY:
CONVENIENCE FOR OUR PATIENTS
AND OUR TEAM.....**

We have the advantage of accessing an on-site dental laboratory. This means less wait time and better color matches for our cosmetic cases. When we have the ability to consult with the technician that will complete your case, we minimize the communication breakdown that may occur due to the distance factor: Your smile and healthy, fully-functioning mouth is our priority.

**EXCEPTIONAL QUALITY AND SERVICE:
WE STRIVE FOR EXCELLENCE IN EVERYTHING
WE PROVIDE TO OUR PATIENTS.....**

The advantage of well trained professionals ensures your needs are met. Our team is dedicated to making your dental experience as comfortable as possible. Treatment planning, scheduling and financial options contribute to a positive experience. Our team is prepared to present options that work well with your budget, and your busy life style. We look forward to serving you, your family and your friends. Our patients always come first!!!

ENVIRONMENTAL RESPONSIBILITY

It is our priority to meet the needs of our patients. At the same time, we are striving to be responsible members of society. Without compromising on effectiveness, we are consciously choosing our products. Our cleaners and disinfectants are locally manufactured and approved by the World Wild Life Foundation (WWF). Additionally, we have eliminated the two greatest sources of waste from a dental office, the mercury from the amalgam fillings and the lead from x-ray film packets. We continue to remain at the cutting edge of dentistry and environmental responsibility.

**EXCEPTIONAL QUALITY AND SERVICE
TO OUR PATIENTS**

DR. IRA SCHECTER

COMPREHENSIVE RESTORATIVE DENTISTRY:

Dr. Ira Schechter has been placing dental implants for over 30 years. Ira will assess your needs and provide a comprehensive treatment plan, including financial options. He will make sure

you understand your unique implant procedure every step of the way. He prides himself on ensuring that your needs are met. Ira has extensive experience with all implant situations, implant placement directly into fresh extraction sites, immediate temporization and, as well, the demands of full-mouth restorations. Our on-site dental laboratory provides our patients with an accurate and timely delivery of custom designed temporaries and completed cases. It is our pleasure to serve you in the most up-to-date and efficient way possible. We look forward to serving you and your family and friends.

BEAUTIFUL COSMETIC DENTISTRY:

Not only is Ira an experienced dentist, but he also excels as a teacher. He offers courses to other dentists teaching them how to build beautiful mouths for their patients. With this additional perspective, Ira creates beautiful smiles and returns his patients to full functionality. Depending on your unique requirements, Ira will determine what will work best for you. He provides crowns, veneers, fixed all-ceramic bridgework, implant-supported restorations, digital shade-matching for aesthetic restorative work, dentures, root canal therapy, teeth whitening, basic dento-alveolar surgery and various periodontal services.

FAMILY ORIENTED DENTISTRY:

Ira treats your family as if they were his own. His extensive new patient examination coupled with his friendly treatment-planning style keeps his patients smiling. Our hygiene team provides the recall visits and periodontal therapy treatment necessary for maximum health benefits. We teach the techniques you need to know to maintain your oral health between visits. Ira and his hygiene team know healthy gums are directly associated with overall good health.

DR. MICHAEL SCHECTER

UNIQUE TREATMENT REGIMES:

Dr. Michael Schechter has a special interest in treating all patients on their own terms. Michael has accumulated expertise, understanding and incorporating dental health into your overall life balance.

He will assess your needs and

provide a comprehensive treatment plan, including financial options. He offers patients alternative remedies to pharmaceuticals, reduced toxicity, and organic products to promote gentle healing. Michael understands your unique requests and will thoroughly evaluate your dental health and help determine the best course of treatment for you.

DENTAL PLAQUE ANALYSIS & EVALUATION:

What is a dental plaque analysis? It is the best way to treat gum disease.it is prevention. Although there are many interventions designed to address infections after they have

occurred, your best bet is to take measures early on to ensure your oral health. A small sample of your saliva and dental plaque is placed under a microscope. Michael will interpret and present the results to you regarding your susceptibility to gum disease. This early detection of possible problems provides an opportunity for you to work with our team to prevent further periodontal complications from progressing.

NATURAL ALTERNATIVE SOLUTIONS:

Michael's passion is to provide the extraordinary benefits of Biological Dentistry to his patients. Moreover, he is conscious of the health controversies prevalent in dentistry today. He is well aware of the overall health benefits of treating the whole body and considers the well-being of his patients his number one priority. You will have the opportunity to explore the dental relationship with diet and lifestyle together with Michael. He keeps current by attending Biological Dental lectures and workshops and through his membership in The International Academy of Oral Medicine and Toxicology (IAOMT). Michael looks forward to addressing your needs with the most effective treatment possible.

OUR FACILITY PROVIDES...

STATE OF THE ART DIGITAL RADIOGRAPHY: FAST, EASY AND EFFICIENT...

The advantage of digital radiography is having instant images. The image is larger and easier to read, interpret, and be explained to our patients. Our concern for our patient's health is evidenced by the incorporation of this technology into our practice as research has proven there to be significant less radiation exposure with digital x-rays.
